

H BEAM WELDING MACHINE

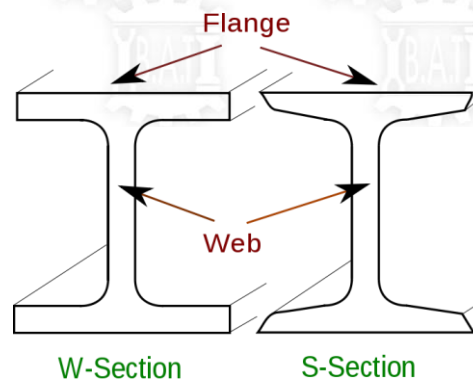

One of the most important parts of building of hangars and buildings, it is the welding. Method of submerged welding has many advantages, some are as follows:

- Very high quality weld surface
- High speed welding
- penetration Weld in 1stage
- uniformly surface with the same penetration rate level

Welding machine with speed control and smooth movement, facilitate welding operations:

Advantage:

- Reduces the welding time
- Smooth and clean weld
- Reduce labor costs
- Increased production
- facilitate the wire change operation
- return the powder and reuse it

Technical INFO

Description	Characteristics
WEB dimension	300~1500
Length of structures (mm)	12000~4000
MAX weight (ton)	20
Transmision speed (m/min)	100~1000
Motor Power (KW)	1/1
submerged welding No	1200 A
Powder Sucking	✓
Welding place setting	Mechanical - atuomatical
High Control sensor	Optional
